FIFTY-SIXTH YEAR. VOL. LVI, No. 269 EDMONTON, ALBERTA—MONDAY, NOVEMBER 16, 1936 Single Copy, Five Cents

Section Foreman Shot Wife, Baby Clubbed Two: Others Sain Ruthlessly

In one of the greatest massacres in Alberta's crime annals, six people are dead—five of them murdered, the sixth, believed to be the murderer, a suicide, at Tieland, 100 miles north of here, on the N. A. R. line to Peace River.

The dead:
CARL SCHWEZ, 40, suicide.
CARL NELSON, 30, murdered.
MRS. ALMA NELSON, 23, murdered.
EDWARD NELSON, 2½, murdered.
JOHN MACINUC, 35, murdered.
GEORGE REUL, 55, murdered.

Mary, Buddy Will Marry

Roosevelt's Son To Wed

ETHEL DU PONT

Believed to have nursed a brooding hatred against Nelson, the N. A. R. section foreman, whose position he held about a year and a half ago, Schwez ran amok Saturday morning, murdering Nelson's wife and child while he was away from the house, then following Nelson and shooting him.

Mrs. Nelson, formerly Alma Ristock, daughter of the section foreman at Flathead, seven miles south, was found dead with her child, apparently clubbed to death, in their home, which had been broken about the head and body.

Shot while eating his breakfast, Macinuc, the section hand, was found dead, still sitting at the table in his caboose, his head fallen forward on the table. He had wife and child living at Flathead.

George Reul, an old bachelor who lived in a little log cabin near Macinuc's caboose, was also shot with a bullet in the head.

First initiation of the murder came when Joe Garry of Flathead arrived at Tieland Sunday morning on a speeder, with Erna Ristock, who was going to visit her sister, Mrs. Nelson. He found Doris Benda, a friend, who had arrived on Saturday's train, coming to work for Mrs. Nelson. The girl had found the section foreman's house locked on her arrival at Tieland and spent the night in a small hotel.

Garry later went on to Chisholm and notified police.

Tieland is a section station, with no other buildings than the section buildings and the residences of the two other men who are believed to have been trapped.

When police were notified, three officers, accompanied by Dr. Lawrence Kirkham, coroner, all from Westlock, rushed by railroad speeder, arriving Sunday evening, when they commenced their investigation. An inquest was being held at the scene of the crime.

Nelson, who was born in Sweden in June 8, 1896, entered the railroad service in 1929 and worked at Tieland, McLennan and Grimshaw before coming to Tieland.

He was employed by the N. A. R. from 1927 to 1933, resigning in the fall of the year due to ill health.

NEW AIR MAIL CONTRACT LET

Investigation of first air mail service to northern British Columbia will take place January 10, 1937, it was announced by the postmaster general.

Flight will be made from Fort St. John to Gold Bar, Finlay Falls, Fort Graham and Fort Nelson. To commemorate this inauguration, philatelic mail will be carried.

Contract for flying this mail has been awarded to United Air Transport, of which Grant McConachie is president.

Editor Dies

ATLANTA, Nov. 16.—Clark Howell, editor and president of the Atlanta constitution and a director of the Associated Press, died here at home here today after a two months' illness.

Fleming, M.P. III

HUMBOLDT, Sask. Nov. 16.—Dr. R. Fleming, federal M. P. for Humboldt constituency, was reported seriously ill with pneumonia to-night.

Interesting Items In Today's Want Ads

Powerful Insulating equipment must sell at a sacrifice. 15 watt amplifier, double speed turntable run from 110 volt light system or generator. All complete for public address work or big swing light. (Reading 19.)

Swing bands for portable type—bicycle, camera or binoculars. (Reading 20.)

Redding room furnished or unfurnished: hardwood floors. (Reading 21.)

Telephone in your Want Ad—3023—we will be glad to "charge" it and send you an account later.

Japanese Bombing Forts

PEIPING, Nov. 16.—Eight Japanese fighting planes bombed provincial fortifications in eastern Suiyuan province in an attack near Tulin. Chinese sources reported today.

Three thousand infantry troops, composed of Manchukuoans and Mongol irregulars, assisted in the assault against Suiyuan defenders, the reports declared.

The attack was reported to have occurred yesterday at the Suiyuan city 125 miles northwest of Kalgan. Mongol accounts which reached Kwei-sai said the attackers launched six separate drives, combining infantry, planes, heavy artillery and tanks.

Suiyuan provincial troops repulsed the offensive, the reports added, inflicting "heavy losses" on the invaders. Suiyuan commanders acknowledged "slight losses."

Recurrent fighting has been reported by Chinese sources in the northern province where, it is asserted, Japanese are attempting to extend their influence westward from Manchukuo.

Chinese sources have insisted actual fighting is in progress between the Japanese-sponsored troops and the provincial army. The Nan-king government recently requested evacuation of all foreigners from the territory on the ground the Chinese could not be responsible for their safety.

SCOUTS SAVE BOY TRAPPED ON CLIFFSIDE

Two Boys Effect Rescue on Perilous 120-Foot High ledge

NEW YORK, Nov. 16.—The screams of six-year-old boy clinging to the cliff face 120 feet above ground in the Palisades Interstate park today brought three Scout leaders to the rescue as he was on the verge of toppling to almost certain death.

The child, Jackie Schwartz, of Tonawanda, N.Y., had worked his way down two-thirds of the cliff when he found he could go no farther. Trapped on a narrow ledge a few inches wide, he was stricken with panic and began to shout and scream.

Talking to the boy to calm his fears, two of the Scout leaders climbed towards him, Jerome Solomon to a point above him and Wm. Bryant to a point below. They then handed him from one to the other and proceeded down to the safety. Harold K. Wm. Scoutmaster, directed the rescue.

I Always Say— (Sex Gracie Allen)

THAT calling those foreign noblemen the matrimonial "cash" of the season is putting it too mildly. Some of those foreign counts and dukes have married money to many times they're more like capitalists.

Rajah's Daughter

With this smile, Pretty Valerie Brooks greeted London as she arrived from Sarawak, North Borneo, where her father, Sir Charles Vyner Brooke, rules as the British empire's only white rajah. Valerie was on a visit to Sarawak for services rendered the sultan of Borneo in 1935.

Twelve bombers escorted by 14 pursuit planes appeared from the west early in the morning flying low over the city.

Devising a barrage of anti-aircraft fire, the attackers headed directly for government troop concentrations in University City in the northwest section of Madrid.

The bombers spread their cargo over the whole northwestern section, including Arguedas and Velazquez districts.

Six bombers returned in the afternoon and killed and injured many in bombardment of Cuatro Caminos suburb. Seven were killed and 100 injured in the morning raid. The number of dead is not known.

JASPER LODGE MANAGER DIES UNEXPECTEDLY

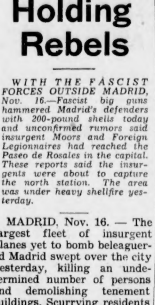

John O'Brien Was One of Continent's Best Known Bonifaces

JASPER, Nov. 16.—One of the best known hotel men on the continent passed away early Sunday morning in the person of John O'Brien, manager of Jasper Park Lodge, the Canadian National Railway's summer resort in the heart of the Rockies. Death followed a sudden heart attack in the manager's quarters at the lodge.

He had been given to few men to view the parade of life so intimately as did John O'Brien. Before the advent of the Chateau Laurier, he had been manager of the Hotel Macdonald in Ottawa.

CLARKE ASKS ALDERMEN FOR CO-OPERATION

Mayor Delivers Inaugural Address at Initial Council Meeting

Appealing to aldermen for co-operation in obtaining a substantial reduction in bond interest rates, which would be the benefit of a cut in the 1937 mill and water rate, councilors lend their strong support to the proposed building program under the Dominion Housing Act, Mayor Joseph A. Clarke, K.C., delivered his inaugural address at the initial meeting of the new council at 7 p.m., Monday.

In his address, which although brief, was much to the point, the mayor referred to his 12-point platform introduced in 1934 and which was supported by council action during the 1935-36 term.

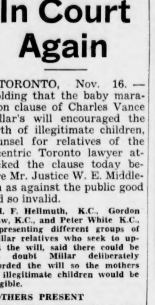

In his speech Monday the mayor also recommended the immediate development of the city power plant and a work-alike program for the relief of unemployment.

Many Clarke's address follows in full:

MEMBERS OF COUNCIL: In welcoming to the inaugural meeting of what is designated as the 1937 council.

Stork-ing In Court Again

TORONTO, Nov. 16.—Holding that the baby marriage clause of Charles Vance Millar's will encouraged the birth of illegitimate children, counsel for relatives of the eccentric Toronto lawyer attacked the clause today before Mr. Justice W. E. Middleton as against the public good and so invalid.

J. F. Hollnath, K.C., Gordon Law, K.C., and Peter White K.C., representing different groups of Millar's relatives who seek to upset the will, said there could be no doubt, Millar deliberately wanted the will so the mothers of illegitimate children would be eligible.

MOTHERS PRESENT

Hill's court clerk duty mothers staked firmly at the three lawyers as they called the contest vicious, degrading and revolting. One claimant of the \$500,000 estate has admitted five of her children were born after she separated from her husband.

The hearing was a continuation of that begun 10 days ago when executors of the will which left the bulk of the estate to the Toronto mother having illegitimate children 10 years, asked the court for direction whether the will was valid. If so, the executors wished to know to whom the money should be paid.

Mr. Justice Middleton indicated today he would not throw the hearing wide open to the testimony of experts who might give evidence on the question of whether the clause was in the public good.

W. E. N. Tiley, K.C., counsel for the executors, read two affidavits.

THE SINGLES CITY OF SAN FRANCISCO

PEOPLE URGED TO PUT FAITH IN SALVATION

Dr. A. R. Osborn Tells Congregations Old Customs Passing

Urging all people, not to place their faith in mere temporal possessions which have their hour and then pass away, but to rely instead upon the salvation which follows an implicit confidence in God, Dr. A. R. Osborn, First Presbyterian church, Sunday discussed the parable of the "Singles City" and its relation to the needs of this present distressed era.

STANDARDS VANISHING

Old customs are passing, values which once formed the standards of our lives are vanishing. As a recent writer puts it, "the foundations of society are crumbling before our very eyes." As he goes about the world, he finds men who are feeling that the time has come when they must turn to God for help. He claims that the time has come when they must turn to God for help. He claims that the time has come when they must turn to God for help.

LEAD COMES BACK

In the midst of such changes the lesson of Meica comes back to us. His religion seemed shattered, but there was just the same. There is a divine power that rules in the affairs of men, a power which brings order out of chaos. What we are experiencing is but the birth throes of a new order. We must seek to find the divine law and the guiding hand of spiritual power; what we do, we have no right to do, but the way to a higher and finer life.

CANADA EXPORT TRADE SOARING

WATERLOO, Ont., Nov. 16.—

"While I do not lay the credit to the Liberals, I do claim that their policies have at least had something to do with the upward trend," Hon. W. A. Baker, minister of trade and commerce, said today. The Liberal Association at its annual conference here Saturday night. The minister said removal of some trade restrictions between Canada and other countries was among those policies, as a result of which the country's annual trade had increased to the \$2,000,000,000 mark.

As to the United States, there was the unprecedented increase in Canada selling more to that country than she bought from it. Referring to Russia, he said, M. P. for North Waterloo, said that Canada had been merely removed the embargo which the country had imposed by the former government.

Total mileage of rural mail routes in the United States has increased 34 per cent. in the last 20 years, while number of carriers has decreased from 41,558 to 34,768.

Will the Act Function?

The people of Alberta are entitled to judge for themselves the unfairness and injustice of The Reduction and Settlement of Debts Act. This is the first of a series of short statements concerning the Act, and its effect on you.

Will the Act function? Be it just or unjust, will it work? There are cases pending in the Courts in which the question of the validity of the Act is raised. Until the decision of the Courts is rendered, it is natural that lending companies cannot be expected in the meantime to prejudice their rights. Companies have been and are still prepared, regardless of what the decision of the Courts may be, to enter upon negotiations and explore all avenues in an effort to arrive at arrangements for the debtor and creditor a course which was recently followed by companies doing business in the Province of Saskatchewan.

Debtors should think over their position, and the doubtful security the Act might provide, before they make any arrangements, taking them they entered into when they obtained their loans. Those who are not debtors should think what their position will be in a community where promises are lightly cast aside. If you cannot trust your neighbor—or your neighbor cannot trust you—what becomes of security and the basis upon which business and all other human relations rest?

This statement is one of a series written by The Mortgage Loans Association of the Province of Alberta. The Association is composed of 14 members, all of whom are lenders of money to the people of Alberta. It is a body of small investors by typical Canadians. Its loans to citizens of Alberta amount to some forty-five million dollars.

SAN FRANCISCO, Nov. 16.—

Two new moves designed to start peace negotiations in the strike of longshoremen and seamen started here today.

Assistant Secretary of Labor Edward McGrady met with representatives of the Federal Labor Board, long lines suggested by employers. At the same time Mayor Angelo Rossi left by airplane for Washington, presumably to discuss the critical situation with President Roosevelt.

ISLAND HARD HIT

San Francisco Bay cities and Honolulu apparently were hardest hit by labor difficulties. About 11,000 maritime workers are on strike here. Vessels also hampered several other industries. Several hundred shipping, textile and warehouse men were out. Milk deliveries were tied up by a drivers strike in Oakland.

SEVENTH OF THE MORE THAN 700

San Francisco Bay cities and Honolulu apparently were hardest hit by labor difficulties. About 11,000 maritime workers are on strike here. Vessels also hampered several other industries. Several hundred shipping, textile and warehouse men were out. Milk deliveries were tied up by a drivers strike in Oakland.

HIRING HALL ISSUE

Rank-and-file seamen strikers at New York concentrated their picketing on the U. S. Labor Washington in an effort to prevent his sailing. The seamen's union claimed he had dock and engine room work. The union claimed he had dock and engine room work. The union claimed he had dock and engine room work.

ANTWERP FEARS

SPREAD OF STRIKE

Antwerp, Belgium, Nov. 16.—Ship painters here proclaimed a strike today. The painters' union claimed that the government was trying to induce dock workers to join the strike. The painters' union claimed that the government was trying to induce dock workers to join the strike.

Chicago Ends Its

Time Experiment

CHICAGO, Nov. 16.—Approximately 4,000 Chicagoans each got a refund of an hour from the city council last night as an eight-months experiment in "summer" daylight saving time came to an end.

The return to Central Standard time was scheduled for 2 a.m. yesterday—was expected to have little effect beyond financial and railroad matters.

Pangborn Reaches

N. Y. From Montreal

NEW YORK, Nov. 16.—Claude Pangborn, round the world flyer, arrived at Floyd Bennett field today. Montreal yesterday prepared a projected transatlantic flight.

Pangborn said he took the Niagara Falls Express to Buffalo, where he planned to deliver a lecture, and then to Montreal, to Canada for coal water test.

After a final series of load tests here, he said he and Martin Gromberg, his co-pilot, would be ready to take off for London.

Daranyi Now Hungry Head

LONDON, Nov. 16.—The exhibition this week of the Royal Society of Portrait Painters will include the first painting of King Edward since his accession.

The painting, by John St. Hedder, shows the King full length dressed in the uniform of an admiral of the Royal navy and wearing the mantle of the Order of the Garter.

PROFIT SYSTEM

IS SUBJECT OF PREMIER'S TALK

Hon. Mr. Aberhart Tells Parable To Illustrate His Point

Addressing the Edmonton Bible conference at the Sunday evening, Premier William Aberhart, emphasized the economic situation. There was a lot of work to do, "we are going to work it out."

His statement was made in reply to a letter from a well known contributor to the Edmonton Evening Bulletin, who had written him to the effect that the Premier's Bible study was a waste of time.

WORK AND WAGES

He also gave the first chapter of the story of a parable which he had taken from the Bible. The parable was about a man who had a field and a vineyard. He hired men to work in the field and in the vineyard. He gave them wages. He gave them wages.

SOLUTION LIES

IN YOUTH, SAYS PEACE SPEAKER

Dr. Warwick Kelloway Tells of Great Geneva Meeting

In the youth of the world and in the determination to secure peace, freedom and equality lies the only hope for the world, declared Dr. Warwick Kelloway at a series of five addresses delivered while visiting in Edmonton on Sunday.

Speaking at the opening meeting

of the seventh annual peace conference in the Bialto theatre on Sunday afternoon, Dr. Kelloway described the Youth Congress at Geneva which he attended last year. He said that the congress was a meeting of minds and a meeting of hearts. He said that the congress was a meeting of minds and a meeting of hearts.

AGONY OF SCARCITY

"The historians of the land recorded the strenuous period as an age of scarcity. The men who were more crafty and diligent soon invented a machine that could dig a hole and bring up by means of a pump, large quantities of water. They were the first called industrialists."

"After the time the people came to

the industrialists in their distress and prayed that they would share with them in some way the pure, fresh water. But the industrialists answered, 'Go now, ye little people. You should we give you of the water which we can so easily secure by our skill and by the power of the machine.'"

"The idea of the cultural heritage

of the individual citizen was unknown. However, when the industrialists saw the lack of dependence on the faces of the famished people they decided to bargain with them and said, 'Upon second thought we have decided to consider your case and we will give you a wage and wages basis. If you work for us we shall pay you wages and with these wages you can purchase the water you need.'"

"The people agreed and thus began

the work and wage program. BANNED IN GROUPS

"Now the industrialists were men of understanding. They agreed to let the people into bands or groups with foremen and managers to control and direct them. Some people were put at a machine to pump water to the great tank or reservoir where the water was stored for marketing."

"A contract was signed to the effect that for every bucket of water poured into the huge tanks, the workers were to receive a penny and for every bucket sold, the industrialists were to receive two pennies. The difference was called profit. The explanation was that this profit made it possible for the industrialists to carry on the business and to meet overhead and replacement expenses. Now then the people were taught that profit was a sound business."

The Premier then went on to tell how the tank eventually overflowed and no more water was needed for it and the people realized in its statement, not obtaining pennies for their buckets of water, that the more water there was, the less they had for themselves. And thus was caused the dilemma.

Nine Former Majors At M'Bride Rites

TORONTO, Nov. 16.—Nine former majors of the Toronto and District Cavalry, who were present at the funeral of Major M'Bride, were present at the funeral of Major M'Bride.

Will of Executed

Red Asks Vengeance

PARIS, Nov. 16.—The widow of Edgar Andre, German Communist executed recently at Hamburg, called for a "world crusade against the bourgeoisie." She called for a "world crusade against the bourgeoisie." She called for a "world crusade against the bourgeoisie."

Indian Agent, Friend

Wade Twelve Miles

PRINCE RUPERT, B.C. Nov. 16.—An Indian agent, W. E. Colman, and a companion, John W. Moore, of Prince Rupert, considered themselves good "waders" today. They went to a fish-warden's house at Lake Louise, where the men reached Terrace, B.C., safely today after wading 12 miles through water that had submerged a number of late falls. They lived on a whale meat during their journey.

First Painting of King Exhibited in London

LONDON, Nov. 16.—The exhibition this week of the Royal Society of Portrait Painters will include the first painting of King Edward since his accession.

The painting, by John St. Hedder, shows the King full length dressed in the uniform of an admiral of the Royal navy and wearing the mantle of the Order of the Garter.

PROFIT SYSTEM

IS SUBJECT OF PREMIER'S TALK

Hon. Mr. Aberhart Tells Parable To Illustrate His Point

Addressing the Edmonton Bible conference at the Sunday evening, Premier William Aberhart, emphasized the economic situation. There was a lot of work to do, "we are going to work it out."

His statement was made in reply to a letter from a well known contributor to the Edmonton Evening Bulletin, who had written him to the effect that the Premier's Bible study was a waste of time.

WORK AND WAGES

He also gave the first chapter of the story of a parable which he had taken from the Bible. The parable was about a man who had a field and a vineyard. He hired men to work in the field and in the vineyard. He gave them wages. He gave them wages.

SOLUTION LIES

IN YOUTH, SAYS PEACE SPEAKER

Dr. Warwick Kelloway Tells of Great Geneva Meeting

In the youth of the world and in the determination to secure peace, freedom and equality lies the only hope for the world, declared Dr. Warwick Kelloway at a series of five addresses delivered while visiting in Edmonton on Sunday.

Speaking at the opening meeting

of the seventh annual peace conference in the Bialto theatre on Sunday afternoon, Dr. Kelloway described the Youth Congress at Geneva which he attended last year. He said that the congress was a meeting of minds and a meeting of hearts. He said that the congress was a meeting of minds and a meeting of hearts.

AGONY OF SCARCITY

"The historians of the land recorded the strenuous period as an age of scarcity. The men who were more crafty and diligent soon invented a machine that could dig a hole and bring up by means of a pump, large quantities of water. They were the first called industrialists."

"After the time the people came to

the industrialists in their distress and prayed that they would share with them in some way the pure, fresh water. But the industrialists answered, 'Go now, ye little people. You should we give you of the water which we can so easily secure by our skill and by the power of the machine.'"

"The idea of the cultural heritage

of the individual citizen was unknown. However, when the industrialists saw the lack of dependence on the faces of the famished people they decided to bargain with them and said, 'Upon second thought we have decided to consider your case and we will give you a wage and wages basis. If you work for us we shall pay you wages and with these wages you can purchase the water you need.'"

"The people agreed and thus began

the work and wage program. BANNED IN GROUPS

"Now the industrialists were men of understanding. They agreed to let the people into bands or groups with foremen and managers to control and direct them. Some people were put at a machine to pump water to the great tank or reservoir where the water was stored for marketing."

"A contract was signed to the effect that for every bucket of water poured into the huge tanks, the workers were to receive a penny and for every bucket sold, the industrialists were to receive two pennies. The difference was called profit. The explanation was that this profit made it possible for the industrialists to carry on the business and to meet overhead and replacement expenses. Now then the people were taught that profit was a sound business."

The Premier then went on to tell how the tank eventually overflowed and no more water was needed for it and the people realized in its statement, not obtaining pennies for their buckets of water, that the more water there was, the less they had for themselves. And thus was caused the dilemma.

Wife Jails Millionaire For a Day

VANCOUVER, Nov. 16.—Short-lived "artificial" radium, produced by a new machine cheap enough to be purchased by almost any metro-

politan hospital and just as beneficial as real radium in the treatment of cancer, was described to a Vancouver Institute audience here Saturday night by Dr. Gordon Shrum, professor in the department of physics at the University of British Columbia.

Artificial Radium, Cheap, Effective Is Described in B.C.

It cost around \$25,000 and weighed many tons. The 1932 price of radium was \$120,000 per gram. Now using the new machine it is possible to produce artificial radium in the amount of a few pennies, enough of the artificial substance to do the same work as half a gram of ordinary radium in a short time," he said.

A small quantity of the artificial

radium, now being manufactured in Saskatchewan, was shipped to Vancouver from the University of Saskatchewan for demonstration purposes.

The material loses most of its efficiency

in four or five days, but that handicap is overcome by the rapidity of manufacture, Dr. Shrum said.

MONDAY, NOVEMBER 16

SIGNS OF THE TIMES

The revenue of the Dominion Government for seven months is up \$40,000,000 over the figures a year ago.

Gold production in Canada is running more than \$11,000,000 a month, promising to far exceed the \$10,000,000 output for the year recently set by Mr. Cassell some months since.

Canadian film output is doing better than "listening in," the radio factories in three months turned out approximately 41,000 receiving sets, 68 per cent more than last year.

There are times when a day's grain of news. They are in harmony with the whole current volume of new regarding production and news. Every issue of every daily paper carries information from one part or another showing that production is speeding up and trade expanding.

The times are on the mend; no doubt about it.

WHAT'S IN A NAME?

Craig and Canyon, of that name, this joyfully heralds the early completion of the splendid motor road being built along the summit of the Rockies to annex Jasper Park to the Banff Park.

"Perhaps next year, if not almost certainly the following year, the new highway connecting Banff and Jasper Parks, between Lake Louise and Jasper, will be open already. The question of a name for this 'wonder road' has been brought up, and the best suggestion yet heard by the Craig and Canyon is 'The Banff-Jasper Highway'—this name has been adopted by Mr. J. L. Brewster—Canadian Infield Highway—and this name has been the endorsement of the Banff Advisory Council."

The name is undoubtedly appropriate, would lend itself readily to publicity purposes, and seems likely to commend itself to general approval.

But what Jasper and Edmonton people would rather like to hear is when they will be able to call the road the "Banff-Jasper Highway," the thing else than a Dream Highway. What they call the road from Edmonton to Jasper depends on how they are mixed in it.

THE GRADS

The grads have celebrated their 21st anniversary, thereby adding another to their amazing list of achievements. They are now the oldest, as well as the best, women's basketball team in the world, with a record unapproached by any other organization.

Adventurous youth passed, the team now enters upon that middle-age period of life which is associated with the maxim: "What we have we hold." And in other facts it is all the Grads can hope to do. There are no more words for them to conquer. Their objective now must be to keep the laurels they have won, against a continually increasing host of competitors.

Fortunately for the peace of mind of Edmonton people, the Grads have been able to do an institution, the team is not only going strong, it is going stronger. This it must do to hold the place against contenders who grow more formidable each season. Contenders, it should be added, who in many cases include players who have been in the Grads and are not bona fide residents of the cities they play for.

THE FIGURES GO UP

At the end of last week more persons were registered as unemployed in Alberta than at any time since the fall of 1933—11,731.

Against the background of these figures carry on obviously discouraging significance, Alberta is apparently not sharing in the improvement in proportion to its population and resources, so far as concerns the unemployment problem.

This is worse now than it was a year ago, and the growing worse, while in other provinces the figures tend the other way.

Part of that may be because registration is carried on more thoroughly than in former years, though that has not been stated to be the case.

A more likely explanation is that there is a steady influx of unemployed people from other provinces into Alberta. That was definitely stated to be the case by the Minister of Labour, Mr. J. G. McCreary, when he visited the province. The movement has probably increased recently, slackened. Promises of the early distribution of dividends, with good times to follow, have been

heard with keen interest by the lenders of Alberta—no doubt with particular interest by those who felt they could only benefit by any change of regime.

It is rather more likely that such hearers are flocking into Alberta in large numbers, in hope of sharing one way or another in the prospective prosperity. To the outsider who cannot get a job, and the one who doesn't want one, the promise of a subsistence allowance for living in Alberta is self-evidently an attractive proposition.

WHY THE WAR THREAT?

The seventh annual Edmonton Peace Conference is in session. To plead for justice in a world daily committing itself to a worship of imperialism; to reprove the arrogance of ambitious despots; to bless peace even as the breath of impending tragedy comes upon a bewildered and dismayed humanity; these tasks surely are the obligations and attributes of an honorable citizenship.

The conference has recruited so much of its support from women organizations, as well as the accredited representatives of the church, should be prophetic of the value of its deliberations. There can be no better apostles of peace than mothers cherishing in their hearts a sacred solicitude for their children, or the servants of that Master at whose word brutality, and all its vile progeny, bowed themselves.

A bold insistence upon moral idealism, by itself, is not an assured guarantee of continuing success. But it is well to emphasize the calamities of conflict and the suffering of mankind can never outgrow the need of that reasonable warning.

A defect of many peace conferences is that they mistake emotional indignation for reason. They rail at Hitler or Mussolini—a sterile though necessary activity in itself—without making any real use of accounting for the inextinguishable hatreds which compel Italy or Germany suddenly to alter its basic institutions of state. A love of "moral philosophy" makes one oblivious of political realities.

Fifty Years Ago

From the Files of The Edmonton Bulletin

The well at J. A. McDougall's residence has been sunk to a depth of 80 feet and no water. It is being bored 24 feet deeper.

Peter Hourie, one of Middleton's sons, is after the fish of his school on Monday last.

Mr. Ross of Fort Saskatchewan who left some weeks ago to see a stevedore, has returned having changed his mind at Calgary.

J. J. Margrave of the H. B. Co., left for Pitt on Monday, with J. A. McDougall. He has been transferred to the Lake Cross district, north of Carleton.

Skating on Rat Lake has been the amusement on these fine moonlight evenings this week.

J. R. Steele, teacher of Belmont school, was presented with a complimentary address, an album, and other tokens of appreciation by the staff of his school on Monday last.

Jas. Doupe, inspector of surveys, arrived from Beaver Lake on Tuesday. He has been inspecting and correcting surveys along the Saskatchewan from Carleton Place, westward.

Two telephones, manufactured by the Molecular Telephone Company of New York have been placed in operation between the house of Chief Factor Hardisty and the H. B. Co. office.

Mr. S. J. B. returned from a trip to Lac La Biche.

Winter.

Hay is abundant at \$3 and \$4 a ton. Old timers' dinner on Dec. 11.

W. Calder shot four deer on Thursday near Lethbridge.

Seigler has returned from a trip to Lac La Biche.

About 200 feet of snow on the level. This beats all records.

P. Pruden killed a deer near his farm north of Sturgeon on Wednesday.

Last night the temperature dropped to 22 below 6 at 6 o'clock and 28 below 7 at 11 a.m.

Chickens 8 cents per pound, turkeys 10 cents per pound.

THIRTY YEARS AGO

Contracts for 90,000 yards of paving were by council last week, to be laid on Jasper, First, Nansu, and McDougall streets. The total cost will be approximately \$25,000.

Mayor Maw announces that he will not be a candidate in the next election.

Ottawa—The G.T.P. has filed plans for a right of way from Edmonton to a point 14 miles west of the Yellowknife Pass.

James Kelly of Hay, 60, holds the record this year for the highest yield of oats. He sowed a field of 21 acres with "Banner" oats the first week in May and harvested 2,700 bushels, or 123 bushels per acre.

THIRTY YEARS AGO

Washington, D.C., December 15, 1905. Germany is to be protected by United States.

Paris—A neutral zone is to be established at Greece to prevent collisions between the Royal Navy and the German fleet.

Ottawa—Correspondence published tonight shows that strained relations have existed between Sir Robert Borden and Sir Sam Hughes for some weeks.

THIRTY YEARS AGO

The Provincial Government and the Board of Trade agreed by committee before the House of Grain Commissioners to oppose an application by the Terminal Grain Company to raise the rate of freight on grain from one cent to one and one-quarter cents per bushel.

Cardiff—The long coal miners' strike that has crippled British industry has been settled. Mills price in England has been raised to eight quarts for one dollar.

Christ Church upon the formation of a traffic committee to act in an advisory capacity regarding the regulation of traffic on the city streets.

The Glands of "Fight or Flight"

By DOCTOR FRANK MCCOY

In the human body there are two adrenal glands, one on top of each kidney, which have been called the "Glands of Fight or Flight."

These glands are about two inches long and are a yellowish-white color. They are absolutely necessary to life. Inasmuch as they are without ducts, they are called ductless glands.

Each gland has two different parts, and the central part secretes a remarkable substance called adrenalin. In any emergency, when it may be necessary to fight for your life or to run for your life, this adrenalin is poured

Dr. F. McCoy directly into the blood stream, bringing about changes in the body which are effected.

For example, the heart contracts with greater force, thus pumping the blood around more quickly; the digestion is stopped which allows extra energy to the legs and arms; and there is a rise in blood sugar together with a rise in blood pressure. With these changes, you are ready to do your best in defending your life, in attacking, or running away. This emergency action of the adrenals is most likely to be called into play when the emotions are strongly aroused—that is, when fear, anger or rage are present.

Although the adrenals provide a valuable "speeding up" mechanism which is instantly used when an individual is put forth a violent effort, they are also of value even when no emergency exists, leaving a profound effect upon many of the processes of the body.

It is always difficult to tell the difference of the ductless glands apart from the others, inasmuch as it seems that they all work together to bring about a series of rapid changes, but it is possible to do with maintaining a state of equilibrium of all the physical processes. Therefore, the adrenals work right along with the other ductless glands such as the pituitary, thyroid, etc.

However, it seems likely that the adrenals have a great deal to do with maintaining the normal temperature of the body, and with the oxidation within the tissues, and with the process of metabolism.

Muscular tone also depends to some extent upon the activity of the adrenals. They are also active in the development of the adrenal secretion than those with weak, flabby muscles. In addition, normal blood pressure depends upon a sufficient activity of the secretion of these glands. One of the most remarkable facts uncovered in relation to the adrenals glands is that the normal activity of these glands greatly increases the defensive powers of the body. Thus, when the adrenals are working normally, we find an individual who is able to resist to disease, while when the glands are not working normally, we have an individual with poor resistance.

It appears that the adrenals also play an important role in the development of the fatigue which result from muscular activity. When these toxins are removed quickly, the onset of the fatigue is delayed. It is only when the failure to resist in time means they will accumulate, which results in early fatigue.

The one who wishes to be a marked success in the world and who longs for the vigor to press forward toward his goal, could make no better payer than to ask for a pair of strong, healthy adrenals.

It is the failure to resist in time means they will accumulate, which results in early fatigue.

QUESTIONS AND ANSWERS

QUESTION: K. O. asks: "I flavoured meat good to use as a cereal for a breakfast food? And should a person with high blood pressure use cereals at all?"

ANSWER: It is better to mix flavoured meat with some other breakfast food, such as real whole wheat grain, or with some of the flavoured breakfast foods. Those who have a markedly high blood pressure should not use cereal foods until such time as they have well overcome the tendency to arterial hypertension.

QUESTION: Gladys G. writes: "Am in good health but have every so often. What is the cause?"

ANSWER: Nerves are caused from chronic hyperacidity of the stomach which is brought on an acute stage by the use of some specially irritating food, or by bad habits of eating and drinking. I suggest that you send for my little book on NUTRITION which is available to anyone at the price of one cent and enclose a large, self-addressed envelope for the return of the three-cent postage stamp. An improved diet will cause the tendency to have to vanish.

Dr. Frank McCoy's great book, "The First Way to Health," is the only book that will show you how to get the most out of your food. It is available to anyone at the price of one cent and enclose a large, self-addressed envelope for the return of the three-cent postage stamp. An improved diet will cause the tendency to have to vanish.

The Passing Show

By J. S. COWPER

The infrequently used religious service called the intercessionary prayer for a lost soul, which Cardinal Pacelli, papal secretary of state conducted in St. Patrick's Cathedral a week ago before embarking on his return journey to Italy, was fully justified by the weather that has been raging on the Atlantic of late.

Landmen seeing the gigantic Queen Mary, or Europa or Normandie lying at a pier, can't visualize such a great thing they can throw these huge creations of man about like playthings. Only a few days before His Eminence conducted his intercession, the Queen Mary arrived in port with thirty of her passengers and crew suffering from injuries caused by being thrown about, and with \$150,000 worth of damage done to her hull.

What a wonderful movie film could be made of a storm at sea. An ordinary camera picture fails to give a sense of the might and movement of the waves. The Extension Department of the University of Alberta has a movie film of a Cape Horn gale taken from one of the Finnish wind-jammers in the Australian grain race. I hope it will be shown in the city soon.

Ordinary movie fans will soon have a chance to see one of the famous Pacific ships on the screen. The Star of Finland has been moved from the graveyard of "ghost ships" in San Francisco Bay to Los Angeles, where it will be covered by Sea Lion. Together with the schooner-rigger yacht, Lottie Carson, she will appear in a film "Souls at Sea," in a number of marine scenes off Catalina Island.

Fifty-five years ago she came down from the banks of Bath, Maine, under the name Kailuani. She was built as a clipper ship, and was called Kailuani of the Kingdom of Hawaii. Duke Kahanu in grass skirts lashed on her decks for the royal highness. After King Kailuani's death, she was passed on to the American people, and was sold to the Alaska Packers' Association. Fitted out as a floating cannery she was rechristened the Star of Finland.

For many years thereafter she was queen of the Alaskan fishing fleet, surviving all her perils by the grace of God. She was later sold to a Canadian, and was renamed the Star of Finland. She has since been in the hands of the Canadian government, and is now being used as a floating cannery.

The Star of Finland is a fine specimen of a clipper ship. She was built in 1860, and is now being used as a floating cannery. She has since been in the hands of the Canadian government, and is now being used as a floating cannery.

REHABILITATION OF DROUGHT ZONE TO BE PROBED

Provincial Minister of Agriculture to Discuss Move Soon

OTTAWA, Nov. 15.—Rehabilitation of the drought area in western Canada will be one of the subjects discussed at the coming conference of ministers of agriculture, Mr. J. G. Gardiner, federal minister of agriculture announced today.

Declaring the drive on the drought problem would go on, Mr. Gardiner issued a statement outlining the work done so far and the next step to be taken.

A survey of the ownership of the drought area and the provincial ministers are to be called to Ottawa in December to discuss a cooperative method of obtaining this information. Mr. Gardiner said that the survey would be completed in the next few months.

In the attack on drought it may be necessary to move people from certain limited areas to more suitable lands, which would be necessary for the government to acquire land on which water developments are contemplated. For these reasons full and accurate information on land ownership is essential.

Mr. Gardiner said in part:

MADE MOVE

Three months ago a definite plan was announced for the drought area of the three prairie provinces. It was then stated that the first requirement was that those who are in difficulties because of the drought should be helped for during the coming winter.

The method under which this is to be accomplished was agreed on between the dominion government and the provincial governments. The provincial and dominion governments are now working on the plan to help those who are in difficulties because of the drought.

BROOMHALL

CHICAGO, Nov. 15.—The very small amount of U.S. grain exports to Canada in the first half of the year has resulted in reports of only one-half of the normal amount being shipped. The drought of 1935 did not result in a large export of grain to Canada, but the drought of 1936 has resulted in a large export of grain to Canada. The drought of 1936 has resulted in a large export of grain to Canada.

LIVESTOCK

By Dominion Livestock Branch
EDMONTON, Nov. 15.—Receipts today were cattle, 213; calves, 13; sheep, 1,000; hogs, 1,000; and poultry, 1,000. The market was generally higher today, with most livestock showing gains. The market was influenced by news of a new strike in the West, which is expected to increase demand for certain livestock.

ST. LOUIS FLYS

ST. LOUIS, Mo., Nov. 15.—The St. Louis Flyers, a new team, defeated the Chicago Cubs 5-2 today in a game that was the first of a series of matches between the two teams. The Flyers, who are managed by John J. McGraw, Jr., are a new team that was formed by the merger of the St. Louis Browns and the Chicago Cubs. The Flyers are a new team that was formed by the merger of the St. Louis Browns and the Chicago Cubs.

Consols Keep Title In Ontario Soccer

TORONTO, Nov. 15.—Completely outplaying the London team, Toronto Consols retained their title today in the Ontario Soccer League. The Consols, who are managed by John J. McGraw, Jr., are a new team that was formed by the merger of the St. Louis Browns and the Chicago Cubs.

Dies By Fall

HOMER, Mo., Nov. 15.—A young man who was killed by a car today in a crash that was the first of a series of matches between the two teams. The Flyers, who are managed by John J. McGraw, Jr., are a new team that was formed by the merger of the St. Louis Browns and the Chicago Cubs.

When Roughriders Held That Tiger

The above shown tonight's scene of the principals in Ottawa Roughriders who over Hamilton Tigers on Saturday. The big crowd was in Frank Turville who came out of retirement to aid Hamilton in this crucial battle. He kicked both Tiger points in the last quarter. On the left, Art Morrison, Ottawa's colourful quarterback, and on the right is "Rocky" Hecman, star kicker of the Roughriders.

The second quarter again featured strong play by the Arts team, which carried the ball down the field in a steady march resulting in a touch, the ball being carried by Jack Thompson, who crossed the line on a back standing up. The Arts team made successful plays, Thompson, making the score 9 to 0 for the Arts.

The opening of the second half found a very determined Engineers, who squared out to do things with the ball. A series of straight backs, carried the ball to the Arts five yard line, but the cultured ones recovered on a fumble and kicked out of danger. Engineers again moved down the field with strong backs the ball being carried principally by Hecman and Morrison. At this time there was no foul, the ball being carried across by Hecman, who broke through the Arts left side. Tricky strategy.

Hecman carried the ball over the line on a back to make the extra point. The Arts team was expecting a kick to make the score 9 to 0 for the Arts.

WERE HELD DOWN

The fourth quarter found the Engineers in a determined drive to another such an Arts rally removed any doubt as to the final outcome. The Arts team, who were both teams driving hard.

The feature of the Arts win was the kicking and punting. Art Morrison, Arts coach, whose kicks averaged 40 yards, was the star of the game. He kicked four beautiful forays, two of which were punts. Jack Thompson was a lower of strength in the backfield, accounting for all points scored by Arts. Goodwin and Graham were also in the game.

With Don Wilson doing stellar work as kicker in place of Morrison, who was injured in a previous game, and Hecman, who was injured in a previous game, the Arts team was able to maintain their lead throughout the game. The Arts team was able to maintain their lead throughout the game.

GLASGOW TRIO THREATENS IN SOCCER RACE

Celtic, Rangers, Third Lanark Closing in On Dons

GLASGOW, Nov. 16.—A Celtic, Rangers and Third Lanark, Celtic Glasgow trio, who are all vying for the title of the Scottish Football League, are closing in on the Dons. The Dons are still in the first rung of the first division ladder as a result of Saturday's game, their loss is a precarious one.

Defeated in two successive games, the general attack that carried Aberdeen to the top of the table early in the season appears to be fading and its chief rivals are closing in on it.

The Dons may have a last of one point over Celtic, who have a game in hand, while Rangers, with 14 points, are only three points behind the Dons. Celtic played three games less. Third Lanark follows Rangers.

Aberdeen went to Edinburgh, Saturday, intent on making amends for the loss of the previous week, but cupholders the Dons, who were heart of Midlothian were decisively defeated. Celtic and Rangers were both in the game.

Celtic led a 2-1 decision at Kilmarnock, but were unable to keep the goal intact in the second half. In the first 45 minutes the famous Glasgow squad were the best of masters, Smith and McCall, Rangers moving in to draw the match.

McCall, Rangers, moved in to draw on even terms with Aberdeen, but Celtic led a 2-1 decision at Kilmarnock, but were unable to keep the goal intact in the second half. In the first 45 minutes the famous Glasgow squad were the best of masters, Smith and McCall, Rangers moving in to draw the match.

Hamilton Bengals Victims of 'Riders In Drizzling Rain

Lose Semi-Final Contest Despite Starry Comeback of Frank Turville — Ottawa Now Meets Toronto Argos in Finals

OTTAWA, Nov. 16.—Ottawa Rough Riders qualified for the Big Four football finals Saturday, staging off a dazzling last quarter Hamilton rally led by Frank Turville to defend a slender margin to the finish. The score was 3-2.

Tiny Herman, 250-pound Rough Rider lineman, booted a field goal from the 11-yard line in the third period after Huck Welch, starry Tiger halfback, had fumbled to give Ottawa possession.

Through a tense final period, in which a crowd of 10,000 roared as the veteran Turville went out to attempt to defend off, Ottawa yielded two singles and at the finish was in scoring position.

Turville, who retired after last season and sat on the bench for three-quarters of Saturday's battle in the mud and sleet and rain, booted both singles. The rallying came back on the 11-yard line and the final score was 3-2.

Former Bulldog Sends Aids To 4-3 Victory

OKLAHOMA CITY, Nov. 16.—Ottawa Rough Riders, former of Windsor Bulldogs, scored two goals Saturday night to aid the newly-formed Oklahoma City team to a 4-3 victory over Seattle Seahawks in the inaugural game here of the Pacific Coast League. Both were on passes from Ash Weber, another ex-Bulldog. Sammy McAdam, Moon Shellen and Hal Taylor scored for the Seahawks. The Hawks and Ottawa Rough Riders counting Oklahoma's other pair.

Seattle's Venerable D. Gidley, Mulren, Downey, Lyons, W. Gidley, and Jim Talbot, McAdam, Frodo, Taylor.

MARCIA CANTIER, daughter of PHILIP CANTIER, a well-known business man, has been announced. Since his disappearance, a shortage of money has been discovered. Marcia has been found. She was a girl who had been in a new place. Afterward, she was in a new place. There is a hope and Marcia was a girl who was in a new place. Marcia has been found. She was a girl who had been in a new place. Afterward, she was in a new place. There is a hope and Marcia was a girl who was in a new place. Marcia has been found. She was a girl who had been in a new place. Afterward, she was in a new place. There is a hope and Marcia was a girl who was in a new place.

One might say that it had involved hardly more than sitting at a desk and accepting funds of money into the New York City. But they were not. He had always played good investment. That was his job. He was a man who was in a new place. Marcia has been found. She was a girl who had been in a new place. Afterward, she was in a new place. There is a hope and Marcia was a girl who was in a new place. Marcia has been found. She was a girl who had been in a new place. Afterward, she was in a new place. There is a hope and Marcia was a girl who was in a new place.

CHAPTER VII

At 5 o'clock in the morning, after his return to the hotel, Frank Kendrick, a dozen blocks away, packed a suitcase. He was in a new place. Marcia has been found. She was a girl who had been in a new place. Afterward, she was in a new place. There is a hope and Marcia was a girl who was in a new place. Marcia has been found. She was a girl who had been in a new place. Afterward, she was in a new place. There is a hope and Marcia was a girl who was in a new place.

He missed Marcia; they had been friends for so long. He thought of her as his old friend. He was in a new place. Marcia has been found. She was a girl who had been in a new place. Afterward, she was in a new place. There is a hope and Marcia was a girl who was in a new place. Marcia has been found. She was a girl who had been in a new place. Afterward, she was in a new place. There is a hope and Marcia was a girl who was in a new place.

There was a heavy fog—wet, cold fog; and Frank Kendrick walked away in it, and was lost again. Marcia met John at 8 o'clock in the lobby of her hotel. He was in a new place. Marcia has been found. She was a girl who had been in a new place. Afterward, she was in a new place. There is a hope and Marcia was a girl who was in a new place. Marcia has been found. She was a girl who had been in a new place. Afterward, she was in a new place. There is a hope and Marcia was a girl who was in a new place.

He was in a new place. Marcia has been found. She was a girl who had been in a new place. Afterward, she was in a new place. There is a hope and Marcia was a girl who was in a new place. Marcia has been found. She was a girl who had been in a new place. Afterward, she was in a new place. There is a hope and Marcia was a girl who was in a new place. Marcia has been found. She was a girl who had been in a new place. Afterward, she was in a new place. There is a hope and Marcia was a girl who was in a new place.

There, of course, was the real fault. He had been led into strange, deep waters and abandoned to struggle alone. He would never have fared so well if he had followed his own course. How Frank Kendrick demanded of himself, could he be blamed for the actions of other people?

He had always sold life insurance—the best, maturest and other kinds of the same character. Marcia has been found. She was a girl who had been in a new place. Afterward, she was in a new place. There is a hope and Marcia was a girl who was in a new place. Marcia has been found. She was a girl who had been in a new place. Afterward, she was in a new place. There is a hope and Marcia was a girl who was in a new place.

Another redskin bit the dust!

SUCH IS LIFE — By Bo Brown

The Gumps

OH, MRS. GUMP—WE HAD SUCH A RAVISHING TIME LAST NIGHT—WE DANCED TILL DAWN!

HM—WHERE'S THAT COLD CHICKEN AND THAT TONGUE AND POTATO SALAD—AND THE CHEESE AND THAT SALAMI?

ER—MRS. GUMP—THOUGHT YOU WOULDN'T MIND SO WE HAD A LITTLE SNACK AFTER WE GOT HOME.

DID SHE SAY SNACK? YOU'D THINK WE WERE RUNNING AN ALL NIGHT FREE LUNCH COUNTER—EMPTY! NOTHING'S LEFT!

SOB—THE SARDINES ARE STILL THERE—WE COULDN'T FIND THE KEY TO THE CAN—BOO—NOO!

Moon Mullins

THERE'S A BURGLAR TRYING TO GET IN DOWN STAIRS—LISTEN—NOW HE'S GOING TO THE BACK OF THE HOUSE.

GOOD GRIEF! LOOK AT YOU—AND WHEN WE WAS WED THROUGH YOU WAS BIG AND BRAVE.

SO DID EVERYBODY ELSE.

SEE, SUGAR, I WAS MERELY AFTER A BED SLAT TO USE AS A WEAPON.

GIVE IT HERE.

MAKE SARCASTIC REMARKS AT ME WITH STRANGERS IN THE HOUSE—WILL YOU?

Gasoline Alley

WHAT'S THE BIG BOOK GOING TO?

THAT'S MY STAMP COLLECTION.

WHAT YOU TAKIN' IT TO? IT'S A SOL FOR!

SOMEBODY WANTS TO SEE IT, THEY WANTED ME TO BRING IT.

WHO IS THAT? BREAK DOWN AN CONFESS—BOY OR GIRL?

TRIXIE, SHE'S INTERESTED IN STAMPS.

SURE SHE IS—3 CENT UNCELANCED ONES. SHE WRITES TO MORE FELLAS THAN YOU COULD PUT IN A DORMITORY.

Myra North, Special Nurse

IT'S STRANGE I CAN'T FIND MY COLLECTOR'S—GREATLY WORRIED—IF ANYTHING SHOULD HAPPEN TO ME, I'D TELL YOU I'D KILL ME.

DON'T WORRY, SIR EDWARD. I'VE BEEN HERE FOR YEARS—TOMBS—

SEE HERE, DEVILS—YOUR DESIGN MAY BE ALL RIGHT, BUT WE CAN AFFORD TO RISK ANY MORE SLIPS BY THE GEL.

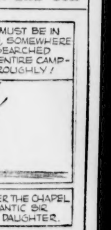

YOU'RE RIGHT, HARRY—FROM NOW ON, SHE'S THE ONLY ONE OF OUR PLANS.

PAY CLOSE ATTENTION, MYRA. DO NOT LEAVE THIS TABLET. I SUMMON YOU—UNDERSTAND? TAKE A FEW OF THESE TABLETS WHEN YOU FEEL DROWN—

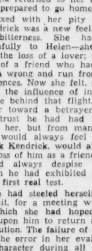

HURRY, DEVILS!

MERLE—OW, MERLE! ANSWER ME!

SHE MUST BE IN HERE, SOMEWHERE—WE REACHED THE ENTIRE CAMP—THOROUGHLY!

Dick Tracy

SCENE: THE OFFICE OF ONE POLITICAL AND UNDERWORLD CHARACTER.

I DON'T KNOW ANYTHING ABOUT MOONIES—I CAN'T UNDERSTAND WHAT YOU WISH TO MY OFFICE.

SHIRTSLEEVE, YOU'RE A DUMBER THAN A DUMBER—YOU'RE A DUMBER—

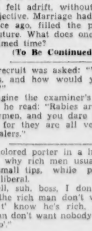

I CHECKED WITH THE OTHERS OF THIS TATTOOING INK AND LEARNED THAT IT'S BEING BOUGHT IN THIS CITY BY YOUR FRIEND, MAYBE.

NOW ALL YOU HAVE TO DO IS TELL ME WHERE I CAN MAYBE GET OUT!

YOU'RE THE DUMBER—GO AND FIND THE PARACUTE—SHAKING EARTH—WAS BYFONES THE CURIOUS SENSATION OF HANGING STATIONARY IN SPACE—ONLY WHEN HE COMES WITHIN 500 FEET OF THE GROUND WILL HIS DOWNWARD SPEED BECOMES AIRBORNE.

Skyroads

THE BLACK VULTURE—ALAS! LITTLE BLUNDER—LADY LUCK HAD GONE MOST MINDFULLY WITH HIS WIFE—HE WASN'T FELL INTO HANDS—

SEEMS LIKE A SWELL JOB—DON'T IT BURN? LOOK! THIS COMPARTMENT—CAME A SECRET PANEL!

SECRET! SECRET! ANYTHING IN IT?

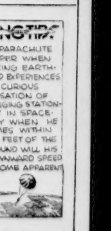

NOW—NOTHING WORTHWHILE—JUST SOME TOOLS—ANY CHANCE OF SACK-FULL OF 1000 MARBLES—OR SUMDING—

HEAVE! EM OUT—NO SENSE IN LOADING 'EM SHIP—THEY'VE GOT A CAR—

UHHH! SEE, BURN! IT MUST BE FULL OF LEAD! I CAN'T EVEN LIFT IT!

SHOVE OVER! I'LL GET IT! HEAVE! HO—AND OUT SHE GOES—

CLINK!

Lady Luck Most Kind
